has the movie script, the script for deleted scenes, production notes, an interview with director Howard Hawks, reviews, commentaries and the original short story that inspired the movie. Now the script part was a bit hard to read with all direction and camera moves. It doesn't flow good but if you can over look that you will love it. This book was a joy to read and would recommend it to all. 1 of 1 people found the following review helpful. Not for the Casual Reader

This is a great resource for students of film, and for those conducting research. Besides the screenplay for this screwball comedy, there are Mast's essay and one by Stanley Cavell. That's well worth the Kindle price for the book.

Bringing Up Baby (1938) is the essence of thirties screwball comedy. It is also quintessential Howard Hawks, treating many of the director's favorite themes, particularly the loving war between the sexes. Bringing Up Baby features Katharine Hepburn as a flaky heiress and Cary Grant as an absentminded paleontologist, roles in which they come into their own as stars and deliver particularly fine comic performances. Pauline Kael has called the film the "American movies' closest equivalent to Restoration comedy." The comparison is based on the quick repartee and witty dialogue, a hallmark of Hawks's work and well conveyed here by Gerald Mast's transcription from the screen.
