1 of 2 people found the following review helpful. Ideal for the desert cinephileBy J. BUCKWALTERThis book resides in many of Utah's National Park visitor's centers for good reason, and it deserves a 5 star review to represent it. What you can find in this book: the history of filmmaking within locations, studios and their respective addresses, driving directions, information on viewing cinematically historic buildings, beautiful full page stills from movies candid shots (approx. every other page or less), gorgeous photography of different areas, full page bios of "the greats" such as Ford, Cooper, Eastwood Redford, lengthy descriptions of the beautiful, well-known movies filmed in the Southwest, and much more. This book can be easily used for a cinephile's road trip, and at home as a useful movie guide. Most importantly, it's written by someone who clearly loves the subject matter and often interjects with incredibly thoughtful input for the reader. Well done!

Cinema Southwest provides film buffs and casual moviegoers alike with the first comprehensive guide to filmmaking in the American Southwest. It is an invaluable reference book and trip planner, packed with interesting facts, and directions to the sites of your favorite movies.
