Ozzy Inguanzo : Constructing Green Lantern: From Page to Screen before purchasing it in order to gage whether or not it would be worth my time, and all praised Constructing Green Lantern: From Page to Screen:

7 of 7 people found the following review helpful. Absolutely stunning! By CarlosAle7 The pictures in this book are incredible! My favorites are the conceptual renderings for the many members of the Green Lantern Corps. It'll be interesting to see what the characters look like on a 3D screen and compare it to the version on the page. If you're a Green Lantern fan, or want to become one, this is the book for you! Lots and lots of background info on the character, the universe it protects, as well as the moviemakers' journey to finally take this wonderful character to the big screen. Highly recommended! 0 of 0 people found the following review helpful. Constructing Green Lantern: From Page to Screen By Anton Incredible book! The pictures in this book are incredible! following review helpful. Essential Read for Movie Fans By Ceelos This book provides incredible insight not only into the Green Lantern Universe, but into film making in general. This book covers all the bases about character bio's and scene construction without giving away too much of the movies mysteries. The amount of information provided by the author is staggering. The development of the planet Oa is an incredible read, and it is filled with concept sketches and beautiful artwork that shows the creative thought process to bringing a universe to life. An excellent Job all around and a very enjoyable read.

Constructing Green Lantern is the ultimate companion book to the movie, showcasing production ephemera including: storyboard art, character sketches, concept art, and still photos from the movie's sets. Constructing Green Lantern will also contain observations and insights of the film by producers, art director, and various other film crew.

"Handsomely produced companion piece to Ryan Reynolds' Green Lantern movie, this coffee table book blends commentary by behind-the-scenes talent with storyboard art, character sketches, concept art and still photos from the set." ~Wired A new book, Constructing Green Lantern: From Page to Screen, gives a kind of production diary that takes you through every stage of creating the movies weird vistas, alien landscapes and green energy constructs. ~iO9.com "For a Green Lantern fan, this is a must have, but what makes it a fascinating read is its ability to transcend just the fanbase. You dont have to know a power battery from a car battery to be impressed (and educated) by this surprisingly thorough time capsule of Green Lanterns first trip to the big screen." ~Hollywood.com Author Inguanzo, the films on-set Green Lantern expert and Assets Manager, didnt get the memo about writing fluffy movie tie-in books and actually wrote a detailed and intelligent production memoir, loaded with photos from the set, pre-viz art, storyboards and final composite images that at least prove that the filmmakers set out to do the character justice. ~cartoonbrew.com Books like these can run the risk of becoming boring technical retellings, but Constructing avoids that problem by structuring the book to follow the plot of the film Its Inguanzos emphasis on story that makes Constructing a book you can actually sit down and read instead of just flipping through it looking for interesting bits. ~bleedingcool.com About the Author Ozzy Inguanzo is Green Lantern's research and asset manager. He has been living at the epicenter of the Green Lantern movie for almost a year and a half. The filmmakers have told us that he is their resident expert on the comic books and the conceptual artwork produced for the film: from storyboards, creatures, and costumes, to environments, vehicles, and props. Geoff Johns is the Chief Creative Officer of DC Entertainment and a comic book writer. Johns is best known for his work on Superman, Green Lantern, and The Flash, and he is credited with bringing Green Lantern to its current levels of popularity.
