researched. He covers the history of jazz quite well considering how compact this book is but his research and insights into the background of jazz is worth reading. This book is not only one of my favourites but is a gem which is not to be missed. 0 of 0 people found the following review helpful. Five Stars By Mackenzieread this for a class at school 6 of 8 people found the following review helpful. The best introduction so far! By Wagner F. Sacco This book is by far the best introduction to Jazz available. The text is clear and entertaining and the books on the "further reading" section are pretty well picked.

*Jazz: America's Classical Music* is a delightful introduction and guide to this complex and compelling music and to its rich history. In an engaging and conversational style, renowned jazz teacher Grover Sales tells of the lives and music of the greats Ellington, Tatum, Hawkins, Coltrane, Parker, Hines, Goodman, Armstrong, and many others with a mix of important facts, fascinating anecdotes, and brilliant interpretations. Illustrated with astonishing photographs of the artists in performance, *Jazz: America's Classical Music* is a classic text, an ideal book for beginners and an inspiring one for serious students of the art of jazz.

**About the Author** Grover Sales is an instructor in jazz studies at Stanford University and the San Francisco Conservatory of Music.
