This game is a "shooter" and a good "shooter" game by any measure (on the same level with Halo as the enemy has good artificial intelligence). But in contrast with most modern "shooter" games it stays close to what is at the heart of the fun, 'TAG'. Just like paint ball, or Nerf guns, the true fun of a shooter is in the hunt and chase (not the gore). Rainbow colored 'bug juice' and a cheat code that puts the enemy in diapers, this is a game that walks the golden line perfectly, a playful hunt and chase that plays with our natural disdain for insects. There is tension and drama here, but the real threat is in how effective of a rescuer you are. The guide book has its hands full with this expansive adventure, but if you dont want to miss out on a single weapon to use against these smart but funny and disgusting bugs then this guide book is a must! Modern games are missing the mark on what adults want. We want to play like we're kids again, but with adult skill and

precision. This game does that beautifully.3 of 4 people found the following review helpful. Reasonably good, needs more info and less photosBy Lisa SheaI'm gaming guide for bellaonline.com and when I saw the previews for Jet Force Gemini, I instantly went out and bought it. We grabbed a copy of this book after finishing the game to see if we missed anything. We hadn't, but the book did! Despite their overly-detailed microsecond-by-microsecond photos, there were mistakes and wrong information. It would have been better if they gave the instructions in a more logical manner, and cut out on the gloss. It's OK if you want reading material to look at pictures, but for real information you can do much better than this elsewhere.0 of 0 people found the following review helpful.
