1 of 1 people found the following review helpful. Great book!!!By jane m deerythe book is so good and excellant for all ages . It opens up the magic and relationship of numbers and geometry.Many Thanks.

16 unique patterns to be drawn. A dot-to-dot colouring and activity book for children and adults. Created simply by joining a long and unbroken line from one to two to three, to the last number of a magic square. This is book is immensely educational and scientific with great artistic value. The transformation of numbers into atomic art creates whole-brain learning.
