I generally do a little or sometimes a lot every day. When I get tired of the regular sudoku I alternate with something else. I love the puzzles with the greater and less than signs, Futoshiki. I always wish there were more. I like the overlapping puzzles. My husband likes the battleships. I was really enjoying the jigsaw puzzles that appeared in a few books but then they stopped. They were really challenging and I found them fun. I wish they would come back. I no longer have the patience to do the ones where I have to add up all the numbers. I pretty much skip Killer and Kakuro. Too much work, not enough fun. I would give it 5 stars because I'm always looking for the next one but gave it 4 because of the reasons stated above. 0 of 0 people found the following review helpful. Great puzzle book By cologir I love this book. It's got a good variety of puzzles and most of them are

difficult enough to take more than five minutes, which is what I don't like about most puzzle books. Usually half the book is made up of easy and easier even though they may be called something else. This is not a book where you end up feeling like you should have paid half the amount because only half the puzzles were any kind of a challenge.0 of 0 people found the following review helpful. Five StarsBy DJP4636Love these books! The variety puzzles are wonderful, better than regular Sudoku.
