Terry Stickels : Just How Smart Are You? 201 Original Mathematical, Logical, and Spatial-Visual Puzzles for All Levels of Puzzle Solvers before purchasing it in order to gage whether or not it would be worth my time, and all

praised Just How Smart Are You? 201 Original Mathematical, Logical, and Spatial-Visual Puzzles for All Levels of Puzzle Solvers:

6 of 7 people found the following review helpful. Just how difficult can it get?By A CustomerI just picked up Terry Stickles latest publication andhe delivers again. This book is a continuation of hisprevious book: Are you as smart... This book contains201 puzzles ranging from math to logic to his famousFrame Games. The puzzles are not really hard, but at the sametime, not easy. You will spend some time on each puzzle.You will not need a calculator or dictionary, just commonsense and a strong thinking cap. I recommend this book;you will not be disappointed.

Terry Stickels is a master puzzlemaker known for the fascinating variety and many forms of his original puzzles. As in his previous book, Are You as Smart as You Think?, he challenges readers with a mix of narrative puzzles to be solved with logical thinking, number puzzles that demand common sense but not higher math, and his very popular "frame games"-puzzles that mix pictures, letters, and numbers to provide fun for puzzlers of every age.

About the AuthorTerry Stickels' puzzles have appeared in such magazines as Discover and Mensa. He has a weekly syndicated newspaper column in USA Weekend and on the paper's website. His puzzles are often mentioned on the Will Shortz's National Public Radio Sunday morning show, and have even been beamed to NPR's widely heard Car Talk. Not only has Stickels created puzzle cards, puzzle calendars and numerous games, but a Stickels brain workout has turned up, to the delight of young (and old) breakfasters, on more than seven million boxes of Raisin Bran!
