Dave Phillips : Mind-Boggling Mazes (Dover Children's Activity Books) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Mind-Boggling Mazes (Dover Children's Activity Books):

0 of 0 people found the following review helpful. Not for me By R. Buick Book of 40 mazes, but not your standard fun-loving "start here and end there." These are high-intensity logic puzzles that require considerable strategy. Each puzzle has info for starting and solution objective. From book's Forward: Do not expect to doodle your pencil leisurely through these pages . . . will intrigue you with geometric trickery . . . most mazes have more than one solution . . . suggest for some mazes tracing path with fingers and do not use a pencil . . . other mazes require you to pass through 3 or more areas only once, without retracing any paths. 7 of 7 people found the following review helpful. Truly Mind-Boggling! By Spring These mazes are very hard, not like your typical children's mazes. They each come with specific instructions, making the already difficult mazes even more so. 1 of 1 people found the following review helpful. Great

for all agesBy ilvldybgMy son loves this workbook!!! He just loves mazes. He is in 3rd grade, and this book's difficulty level is just the right amount for him.

Mazes that shimmer, advance, recede, jump, pop, and wiggle here are 40 mazes, all incorporating op-art effects and other visual illusions designed to challenge your search for the solution and to add to the enjoyment of finding it. Created by master maze-master Dave Phillips, all of the mazes are ingeniously designed. The exciting variety of mazes include several 3-D mazes, eccentric circles, spirals, wavering squares, a two-page fortress maze, and many others. There are mazes where you start in one area and finish in another and others where you pass through three or more areas only once, without retracing any paths. Directions and solutions are provided in the back.
