#6005229 in Books 2008-05-10 Binding: Cards 54 pages | File size: 67.Mb

**Professor Al : MKE Blackjack Practice Deck** before purchasing it in order to gauge whether or not it would be worth my time, and all praised MKE Blackjack Practice Deck:

Practice playing blackjack anywhere. The backs are like a regular poker deck. Shuffle them however you like. The faces depict 48 players' initial 2-card hands readable either way. These hands are the ones where the correct play depends on the dealer's upcard -- less than 30% of the possible hands. (The rest are basic strategy "automatics" always hit or always stand.) Just 26 of the 48 cards (hands) needed to master basic strategy. Great for both beginners and experienced players. Reduces practice time by up to two-thirds. Much more efficient than dealing hands to yourself or playing computerized shoes. Includes 6 instruction cards of practice techniques.

About the Author Professor Al (nom de guerre) came up with the MKE Practice Deck when he finally realized how much practice time was being wasted with "automatics": initial two-card hands that are always played the same way no matter what the dealer is showing. He is still flying under the casinos' radar, and has turned the saved practice time

into playing time. And can now make a quick trip whereas before he had to plan at least a week ahead to get in the proper practice time.
