Robert Pace : Music for Piano: Book 1 before purchasing it in order to gauge whether or not it would be worth my time, and all praised Music for Piano: Book 1:

1 of 1 people found the following review helpful. Fun for inquisitive young pianists
By Customer I learned piano many years ago with the John Thompson method books. However, I love this series because it focuses more on music theory. It is the idea of music with singing and clapping and moving, as well as the training of fingers, and learning how to read. I have now used it for teaching three different kids (who are 5, 7 and 10 year olds) and so far things are going really great! This book is worthwhile even for skilled pianists, as it is a different way of looking at music. You may find that you are much more comfortable transposing!
6 of 6 people found the following review helpful. So Far so Good:)
By Virginia L. Caronna I myself play Piano and have been on and off for about 20 years. I wanted something that had a good method to teach my 12 year old son how to play. The book is working out wonderfully. I am using this method for one of his extra curricular activities in homeschool and today will be the first day he learns how to read music (8/27/12. He started this music course on 8/13/12. I like how the book teaches my child to play with just using the numbers per finger method in different ways, that way he gets the feel of the music before going into the technical aspects of it. Thank you so much for making a method that works great and is easy to understand!
0 of 0 people found the following review helpful. Perfect for late elementary students!
By Kathy in Denver Outstanding series! Everything students need is presented in the 4 books for each level. Marvel soundscapes with interesting literature. Many concepts for use at the intermediate and advanced levels are presented clearly. Comprehensive and complete!

(Pace Piano Education). This 5-book series of educational keyboard books is packed with instruction including lessons, exercises, and songs. Each book has 48 or more pages tailored to the student's needs from beginner (Book 1)

to the intermediate or advanced pianist (Book 6).
