Eric P. Jensen : Music With the Brain in Mind before purchasing it in order to gage whether or not it would be worth my time, and all praised Music With the Brain in Mind:

3 of 3 people found the following review helpful. Wonderful bookBy MelissaI'm a music teacher, and this book has ,made ,me understand so much more about music and the connections that it reinforces not only in the brain, but in life as a whole. A MUST-READ for any musician, and music educator.1 of 1 people found the following review helpful. Deep, but thorough book connects music with brain processesBy GeneThe only difficulty it presented to me was its depth in describing the processes of the brain (kind of ironic!), but it leaves you thoroughly convinced of the power of music.0 of 0 people found the following review helpful. Four StarsBy Fabian AttounI like it, but it was not what I thought it turned out to be.

Formerly a publication of The Brain StoreThis timely resource covers the latest brain and music research and provides practical strategies for incorporating the musical arts to support learning at all levels.

About the AuthorEric Jensen is a former teacher and current member of the Society for Neuroscience and New York Academy of Sciences. He has taught at all levels, from elementary through university level and is currently completing

his PhD in human development. In 1981, Jensen cofounded SuperCamp, the nations first and largest brain-compatible learning program, now with over 50,000 graduates. He has since written Teaching with the Brain in Mind, Brain-Based Learning, Deeper Learning, Arts with the Brain in Mind, Enriching the Brain, and 21 other books on learning and the brain. A leader in the brain-based movement, Jensen has made over 45 visits to neuroscience labs and interacts with countless neuroscientists. He was the founder of the Learning Brain EXPO and has trained educators and trainers for 25 years worldwide in this field. He is deeply committed to making a positive, significant, lasting difference in the way we learn.
