**From Brand: Amsterdam University Press : New Perspectives on Games and Interaction (Amsterdam University Press - Texts in Logic and Games)** before purchasing it in order to gage whether or not it would be worth my time, and all praised New Perspectives on Games and Interaction (Amsterdam University Press - Texts in

Logic and Games):

In 2007 at the Dutch Royal Academy of Sciences in Amsterdam, a colloquium on new perspectives on games and interaction brought together researchers on games in logic, computer science, linguistics, and economics in order to clarify their uses of game theory and identify promising new directions for the field. This volume is a collection of papers presented at the colloquium, and it testifies to the growing importance of game theory as a tool that can capture concepts of strategy, interaction, argumentation, communication, and cooperation amid the disciplines.

About the Author Krzysztof Apt is professor of computer science and Robert van Rooij is a senior staff member at the Institute for Logic, Language and Computation at the University of Amsterdam.
