Never say neverBy intaThis book has been around for a while, but I've resisted buying it until now as I thought "I can't be bothered with this extra twist". Having received it recently (run out of DAJPE books....was resorting to inferior product! Can't have that), I have changed my mind and am very glad i took the risk! You do have to get your head into a slightly different space, and get out of it again when you're doing other puzzles, but don't let this deter you. DJAPE reminds you on every page that we are doing non-con. Thanks for that - it helps! Explanations as usual are great, as is paper quality. I have found that once in the non-con headspace, it's actually easier in many cases to solve these puzzles....not that that makes them too simple, no, no. But being stuck on a killer sudoku and remembering that you can eliminate some numbers because of the non-con rule is really nice. There are several variants to try, which makes things even more interesting.1 of 1 people found the following review helpful. AwesomeBy CJThis puzzle book has Samurai, Double Sudoku, Sudoku X, Double Sudoku X with different difficulty levels. It is so much more than any of the other Sudoku books I have tried and I have tried a bunch. I couldn't put it down in fact I got upset with my father n law because did some of the Samurai ones.I even contacted Djape to see if he was going to make another one.If you love or even just like Sudoku you will love this one. I have finished my first one and have ordered the book again it is one of my favorite ones.1 of 1 people found the following review helpful. Great, relaxing and challengingBy Lloyd Wayne PollardAll of the Djape books are great!!

Non-consecutive Sudoku puzzles look like your ordinary Sudokus. However, there is one extra rule: two consecutive numbers **MUST NOT** be placed next to each other (horizontally or vertically). This makes the puzzles even more thrilling and requires you to use some new solving techniques. This book contains 150 of these puzzles in different shapes and sizes: standard, Samurai, TwoDoku, Double Sudoku, Sudoku X, Flower, Butterfly, Ring and even Killer Non-Consecutive Sudoku!
