This one stands out as the most enjoyable of all of them, at least for me. On the one hand, the variety and complexity was enough to make it quite interesting. On the other hand, even though I do these things with a pen, there wasn't any puzzle SO hard that I

couldn't get it in the end (without messing up the page). Thanks to DJAPE, which does very well in general. 1 of 1 people found the following review helpful. Five Stars By A. Springer I love it.

Non-Consecutive Sudoku puzzles look like ordinary Sudoku. However, they are extremely extraordinary! There is an additional rule which must be followed: two non-consecutive numbers must not be placed next to each other. So, 5 and 6, 9 and 8, 2 and 1 and so on, can never be adjacent. And that's all! This changes the Sudoku game quite a bit and it makes it more challenging and fun. But there is more! While all puzzles are indeed non-consecutive, there are also many variants of the non-consecutive sudoku variant: Diagonal Non-Consecutive Sudoku Jigsaw Non-Consecutive Sudoku Odd/Even Non-Consecutive Sudoku Greater/Less Non-Consecutive Sudoku Killer Non-Consecutive Sudoku Outside Non-Consecutive Sudoku Overlapping Non-Consecutive puzzles: TwoDoku, Flower and Samurai Sudoku Non-Consecutive Sudoku in various sizes: 6x6, 8x8, 10x10 Frame Non-Consecutive Sudoku There is no other book with all these puzzles! :)
